Would be great to get these materials on Sharepoint if someone knows how to do that...

~Alexa

Yes. I don't think they will balk.

Brett, since you have been working with Bruce on this, can you make the request for a clean copy of what they are sending and an index of the documents? If he balks, I'll have Mike call Steve, but hopefully we can just get it taken care of. Thanks, David

I agree. Bruce Reeves was going to give us some sort of listing to make sure we have everything, but I think we need a clean copy of the package as DOGGR put it together.

We can certainly review the emails and attachments, but Michele and I were just discussing whether we should have DOGGR send us hard copies of everything, perhaps with an index of documents? I can ask Mike to call Steve B.

I have more emails which I will forward now. There may be a few more we need to get, which we will need to clarify.

**Subject:** DOGGR Documents, first of nine (1/9)

Brett:

Here is the first of nine emails conveying PDF Portfolio documents responsive to the Regional Administrator's July 17 request for our documents pertaining to requests for aquifer exemptions, EPA's approval

or denial of such requests, and any post-primacy appeals by the State regarding aquifer exemptions. The vast majority fall into the first two categories.

Please be advised that our search for documentation is still ongoing, and we expect we may find other documents.

Three things to note. First, if you can't open PDF Portfolios, they can be extracted by your IT folks to their component files, I believe. Let me know if this is not the case. Second, I was unable to break out the Olcese Exemption file into its component documents in time to make this delivery. Third, I did not get time to scan the Asphalto/Tulare exemption file, but will do so this week. I believe other aquifer exemption files exist, and am pursuing them.
